

All-West Components & Fasteners an Endries International Inc. Company

RoHS Statement

All-West is a distributor of fasteners and electromechanical hardware and has a responsibility to pass information to the supply chain as it becomes available. Customers must take an active role in understanding environmental compliance and specifying products to meet various regulations accordingly.

Directive 2002/95/EC came into force on July 1st, 2006 on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment (“RoHS”). All-West strongly supports this directive as it provides health benefit to people and our environment by restricting six substances in the manufacturing process.

RoHS Directive, 2011/65/EU applies to the same restricted substances as the original directive, Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent chromium (Cr6+), Polybrominated biphenyls (PBB), Polubrominated diphenyl ether (PBDE). On March 31, 2015, the directive was amended by 2015/863/EU. This amendment added four additional restricted substances, Bis(2-ethylhexyl) phthalate (DEHP), Butyl benzyul phthalate (BBP), Dibutyl phthalate (DBP), and Diisobutyl phthalate (DIBP).

All-West supplies RoHS compliant material when specified by the customer and made known to us at the time of quotation. All-West restricts its purchasing of non-compliant material but has certain customers who require parts that are not RoHS compliant and All-West exempts those items from this policy. Products that are RoHS compliant are identified as such in our inventory management system.

For questions regarding RoHS, please contact us.

Sincerely,

Rick Peterson, CEO
